

What is claimed is:

1. A body molding for car, comprising:

5 a transparent strip in the form of an elongate member
made of a transparent material, said transparent
strip being provided at a rear side with a saw-toothed
surface, and at either end with at least one lamp
hole; and

10 at least one light source mounted in said lamp hole
at one of two ends of said transparent strip.

2. The body molding for car as claimed in claim 1, wherein

15 said light source comprises a light emitting diode
(LED).

3. The body molding for car as claimed in claim 1, wherein

20 said transparent strip is provided at top and bottom
surface with electric plating layers.

4. The body molding for car as claimed in claim 1, wherein

 said transparent strip is provided at the rear side
with at least one connecting means.

5 . The body molding for car as claimed in claim 4, wherein
said connecting means comprises an internally
threaded stub.

5 6. The body molding for car as claimed in claim 1, wherein
a plurality of said transparent strips are adapted
to mount on a radiator grille of said car.

10 7. The body molding for car as claimed in claim 1, wherein
a plurality of said transparent strips are adapted
to mount on a rear fender of said car.

15 8. The body molding for car as claimed in claim 1, wherein
a plurality of said transparent strips are adapted
to mount on a front bumper of said car.
